ENVIRONMENTAL AND QUALITY POLICY		Page 1 of 2	

Villanuova s/c, January 2018

A.F.A management below details the key aspects on which it bases its own company philosophy, defining a plan of objectives for the purpose reviewing them.

- ⇒ minimising costs of internal (re-works, trials, rejects) and external (returns, component to be restored) poor quality
- ⇒ improving the level of customer satisfaction
- ⇒ consolidating the acquisitions of market shares for product types, also looking for new foreign clients
- ⇒ monitoring and improving the following factors: availability (downtime), machine set-up time
- ⇒ defining adequate partners (suppliers) for product types
- ⇒ constantly implementing and maintaining the culture of “continuous improvement”, by supplying the necessary resources and maintaining a stimulating work environment
- ⇒ improving efficiency in the equipment department
- ⇒ optimising work time in the planning stage

Additionally, for A.F.A. the supervision of environmental performance and continuous improvement in environmental management are the tools for sustainable industrial development, in compliance with the needs of all parties involved.

The main objective of A.F.A s.r.l. is:

- the continuous compliance of applicable laws and all other environmental provisions undersigned by the company;
- the commitment to continuous improvement towards environmental protection and pollution prevention, which may be presented under different forms and may regard

different environmental aspects, both directly and indirectly.

- **a commitment to demonstrating that the materials treated in production come from conflict-free sources in order to allow for a responsible and sustainable supply chain and therefore comply with the CFS programme (conflict-free).**

This means:

- constant internal and external communication availability in environmental matters (in particular with the current policy available to the public);
- commitment to the periodic check of compliance to environmental laws and requirements;
- periodic definition (at least during management review) of specific improvement objectives and environmental targets and their monitoring;
- commitment to periodic evaluation, through internal audits, of the suitability of the Environmental Management System and of the policy regarding activities and of environmental impacts of our company;
- distribution of the current Policy to all the staff through the operational implementation of the Environmental Management System in relation to individual activities;
- distribution of the current policy to the public through its publication on the company website.
